

TagMaster Launches New reader System Software release 1.6.1, called Ease of Use – Cloning, at ASIS trade show in Los Angeles

Stockholm, Sweden, Sept 14th 2009 - TagMaster, a global leader in high performance long-range RFID solutions for Automatic Vehicle Identification (AVI), Transportation and Access Control Applications, launches the new reader System Software release (SSW) 1.6.1, named Ease of Use - Cloning. The TagMaster focus is to facilitate an improved Life Cycle Cost for AVI installations. This SSW release contains support for volume installation of readers in an efficient way – a method called Cloning. Cloning will assist our partners in their configuration of new readers by automatically duplicate a configuration to the next reader using a USB stick attached to the readers.

The Cloning functionality in the Long Range-reader generates a configuration script that is downloaded to a USB stick attached to the reader. This script can then be used to configure the next reader automatically, reusing the already made configuration. This means that you can configure a number of readers in a more efficient way. You can also store previously made configurations until the next time you want to use the same reader set-up.

Reader configuration cloning using scripts downloaded to a USB stick

As is shown in the reader web configuration page above there are different Cloning script configuration supports given. One example is automatic IP address step up when copying the configuration to the next reader.

About TagMaster

TagMaster is a Swedish technology company founded 1994 with headquarters in Kista (Stockholm), Sweden. TagMaster designs and markets advanced long-range radio frequency identification (RFID) systems and information services associated with automatic vehicle identification, rail bound transportation and people access, in order to increase efficiency, security, convenience and to decrease environmental impact. TagMaster exports mainly to Europe, Asia and North America via a global network of partners, systems integrators and distributors. TagMaster shares are traded on First North in Stockholm, Sweden. TagMaster's Certified Adviser is Remium AB. www.tagmaster.com
