

TagMaster Long-range Readers integrate with ISONAS Access Control system

Stockholm, Sweden, 15 January, 2010 – TagMaster, the leading producer of advanced long-range and high-performance identification systems based on Radio Frequency Identification (RFID) systems for Automatic Vehicle Identification (AVI) solutions announced today that ISONAS Security Systems Inc., the US based leader in IP access control solutions, has successfully tested the integration of TagMaster LR-series Long-range Readers with its Access Control system.

Customers looking to achieve flexible control of their parking facilities while reaping the benefits of leading RFID AVI and IP Access control technologies can now depend on TagMaster North America and ISONAS to deliver the solution.

Using TagMaster reader and ID-tag technology, vehicles gain fast and convenient parking garage access. True hands-free long range identification ensures a free flow solution without hassle providing an efficient and environmentally friendly parking solution. Vehicle authorization is enabled by ISONAS PowerNet, whose TCP/IP-driven infrastructure makes this possible, on-site or remotely, whether near-by or miles away.

“Here at ISONAS we have been impressed with the technical superiority of the TagMaster Long Range reader line. The TagMaster integration with the fully featured ISONAS access control system provides an important extension of the capabilities of enterprise access control to the parking facility of any building”, said Steve Rice, VP of Sales and Marketing at ISONAS.
